

What is the Illinois Pioneer Coalition?

The purpose of the Illinois Pioneer Coalition, (IPC) is the improvement of quality of life for individuals served and staff in all long-term care settings throughout the State of Illinois. The values, practices and approaches of person-centered care are the tools that can transform the culture in which we care for our elders and persons with disabilities. The means through which the IPC achieves this purpose include, but are not limited to, advocacy, education, public awareness, research, support for local coalitions and training.

Why join a Regional Illinois Pioneer Coalition?

Regional Coalitions are located throughout the state and draw upon the resources of individuals and organizations to improve the life for elders that are served in local communities.

This is accomplished by providing programs of education and soliciting engagement with providers, family members, regulators, and residents.

Learning innovative ideas, sharing best practices, and finding the courage and support of our peers in the long-term world is what makes these groups so valuable.

By adopting Culture Change practices, it has been proven that...

- Residents are more satisfied
- Staff are happier
- Staff turnover cost are reduced
- Life just feels better for all!

We are starting a **Regional Coalition** in the **Chicagoland** area and are looking for forward thinking people in the community to be part of our **Leadership Committee**. The Leadership Committee will be responsible for planning education and training sessions in our area of the state so that we can support the mission of person centered/directed care for the elders in our communities!

We will be having a face-to-face leadership meeting to kick-off the Regional Coalition
on

November 1st, 2017 at 10:30 at Aperion Care International
4815 S. Western, Chicago, IL

Please RSVP to: *Lee Moriarty:* lmoriarty@QTCTherapy.com
